

- 1 Make sure you have a text editor installed (Atom, Notepad++ or Sublime Text). If you need help, ask a mentor to install it for you. After installing, open your text editor.
- 2 Download the zip file from kata.coderdojo.com/Beginner_Javascript_Sushi.
- 3 Unzip the compressed folder and move it to your documents folder.
- 4 **Open** the "**Beginner-Javascript-Sushi**" folder and make sure it has the same files as the screen below.
