

MySQL is the world's most popular open source database. With its proven performance, reliability and ease-of-use, MySQL has become the leading database choice for web-based applications, used by high profile web properties including Facebook, Twitter, YouTube, Yahoo! and many more.

1 Double click the XAMPP installer (.dmg). A new panel will open and press double click on your mouse again to start the setup process.

2 A setup wizard will open and will show you a welcome page. Click **Next** to proceed to the next step.

3 This page shows you what features or components you want to install. Make sure all boxes are ticked and then click **Next**.

4 This page where XAMPP will be installed. Click **Next** to proceed with the setup process.

5 **Untick** the box and click **Next** to proceed to the next step. Click **Next** again to start the installation.

6 Once the installation is done, leave the box ticked and press **Finish** to complete the installation process and open the XAMPP control panel.
